

QUIK>BRIK
STRUCTURAL VENEERS

THE STRUCTURAL PERFORMANCE OF CONCRETE MASONRY. THE RICH LOOK OF BRICK. ALL IN ONE.

QUIK-BRIK IS A STRUCTURAL BRICK VENEER. Unlike traditional brick veneers that require a structural back-up, Quik-Brik can stand alone. And because it's concrete masonry, it's durable enough to stand the test of time. With Quik-Brik, you enjoy: >> the structural performance of concrete masonry >> the rich look of brick >> efficient, one-step installation >> consistent availability of colors >> delivery and service nationwide >> long-lasting beauty >> a variety of colors and shades. Whether your project is large or small-scale, Quik-Brik is the smart choice in exterior masonry.

INSTALLATION THAT'S QUICK AND EASY.

Installing your concrete masonry units is a fast, one-step process. It's much more efficient than the time-consuming process needed to install a typical brick veneer. This improved efficiency expedites project completion, lessening the amount of work time between blueprints and "open for business."

THE RICH BEAUTY OF BRICK.

When it comes to giving your project the rich look of brick, Quik-Brik more than lives up to its solid reputation. Whether viewed from the street or right up close, there's no mistaking Quik-Brik's rich, distinctive brick appearance.

A BROAD COLOR PALETTE.

We understand just how important color is to your building's appearance. With Quik-Brik's extensive color palette, you'll be able to find just the right color and shade to bring out the best in your design. Select with the confidence of knowing that regardless of the choice, you'll never have to worry about weathering or fading. Our blended colors are permanent, pure and non-fading – integral factors in the equation that add up to Quik-Brik's unsurpassed durability. Most importantly, we are extremely aware of your needs to color match your buildings from region to region.

NATIONWIDE DISTRIBUTION AND SERVICE.

With Quik-Brik, you have access to a national network that can dramatically reduce the time it takes for your order to reach its destination, and insure that the brick colors you want are always available and ready to deliver. Our national service capability means you have Quik-Brik personnel close by when you require assistance. The bottom line? Oldcastle's® nationwide availability and dedication to responsive service means you receive high-quality products, consistent colors and the solutions you need wherever, whenever, and however you need them.

QUALITY IS BUILT-IN.

Quik-Brik is manufactured to meet today's more stringent building code requirements. In fact, our concrete masonry exceeds the requirements of ASTM-C-90 for compressive strength and absorption. And because it features hollow cores, you can use loose-fill or foamed-in insulation to increase the wall R-values and create energy-efficient walls that meet Model Energy Code. The hollow cores also allow for the placement of grout and rebar, which some local codes require.

STANDS UP TO THE ELEMENTS.

How attractive your building looks years from now can be determined before you even break ground. If it's built with Quik-Brik, it will be able to withstand fading and other damaging environmental conditions. In addition, your building will be well protected from water penetration associated with wicking. That's because Quik-Brik features an integral water resistant polymer that's mixed in during manufacturing.

THE BENEFITS BEGIN WITH A PHONE CALL.

The structural performance of concrete masonry. The rich look of brick.

All backed by responsive delivery and service system's. Simply put, Quik-Brik delivers the value and quality to make each one of your projects a success.

SINGLE-WYTHE CONSTRUCTION
NEVER LOOKED THIS GOOD.

Meeting Local Covenants:

During planning for a new retail complex in Macedonia, Ohio, city officials required all buildings to use brick veneer. The developer proposed the use of Quik-Brik to conform to local aesthetic covenants while still keeping within cost objectives for the construction project. Local city officials approved the use of Quik-Brik for this large retail complex, spanning over an entire mile in length. Quik-Brik provided both the developer and city officials a true win-win, providing the rich look of brick, faster construction and significantly lower costs than traditional brick veneer/block back-up construction

QUIK-BRIK OFFERS:

- >>THE RICH LOOK OF BRICK.
- >>INCREASE SPEED OF CONSTRUCTION. ON TIME. ON BUDGET.
- >>NATION-WIDE COLOR CONSISTENCY AND VARIETY
- >>CONFORMANCE TO LOCAL AND NATIONAL BUILDING REQUIREMENTS.
- >>ENERGY EFFICIENCY WITH INSULATION & GROUTING OPTIONS.
- >>FIRE AND MOLD RESISTANT.
