**QUIK>BRIK®**  
**STRUCTURAL VENEERS**

An **Oldcastle** Architectural Product

QUIK-BRIK IS A STRUCTURAL BRICK VENEER. Unlike traditional brick veneers that require a structural back-up, Quik Brik can stand alone. And because it's concrete masonry, it's durable enough to stand the test of time. With Quik-Brik, you enjoy: >> the structural performance of concrete masonry >> the rich look of brick >> efficient, one-step installation >> national availability of colors >> delivery and service nationwide >> long-lasting beauty >> a variety of colors and shades. Whether your project is large or small-scale, Quik-Brik is the smart choice in exterior masonry.

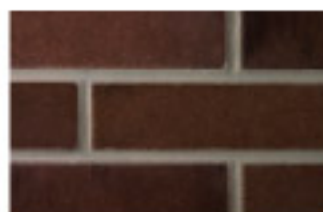

## QUIK-BRIK offers ALL IN ONE performance:

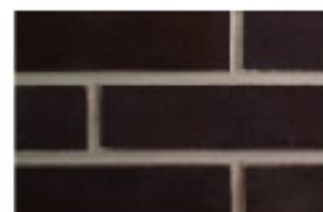

- >> THE RICH LOOK OF BRICK.
- >> INCREASED SPEED OF CONSTRUCTION. ON TIME. ON BUDGET.
- >> NATION-WIDE COLOR CONSISTENCY AND VARIETY.
- >> CONFORMANCE TO LOCAL AND NATIONAL BUILDING REQUIREMENTS.
- >> ENERGY EFFICIENCY WITH INSULATION & GROUTING OPTIONS.
- >> FIRE AND MOLD RESISTANCE.

## STRUCTURAL VENEERS

An **Oldcastle** Architectural Product

QUIK-BRIK: the cost-effective alternative to traditional clay brick

### INSTALLATION THAT'S QUICK AND EASY.

Installing your concrete masonry units is a fast, one-step process. It's much more efficient than the time-consuming process needed to install a typical brick veneer. This improved efficiency expedites project completion, reducing the amount of time between blueprints and "open for business".

### THE RICH BEAUTY OF BRICK.

When it comes to giving your project the rich look of brick, Quik-Brik more than lives up to its solid reputation. Whether viewed from the street or right up close, there's no mistaking Quik-Brik's rich, distinctive brick appearance.

### STANDS UP TO THE ELEMENTS.

How attractive your building looks years from now can be determined before you even break ground. If it's built with Quik-Brik, it will resist fading from UV light and the damaging environmental conditions. Your building will be well protected from water penetration associated with wicking because Quik-Brik features an integral water resistant polymer.

### NATIONWIDE DISTRIBUTION AND SERVICE.

With Quik-Brik, you have access to a national network that dramatically reduces the time it takes for your order to reach its destination, and insures that the brick colors you want are always available and ready to deliver. Our national coverage means Quik-Brik personnel are close by when you require assistance.

### QUALITY IS BUILT-IN.

Quik-Brik meets today's stringent building requirements, and actually exceeds ASTM-C-90 requirements for compressive strength and absorption. Because it features hollow cores, loose-fill or foamed-in insulation can be used to increase the R-values and create energy-efficient walls that meet Model Energy Codes. Hollow cores also allow for the placement of grout and rebar.

### THE BENEFITS BEGIN WITH A PHONE CALL.

The structural performance of concrete masonry. The rich look of brick. All backed by responsive delivery and service system. Simply put, Quik-Brik delivers the value and quality to make each one of your projects a success.

For more information, or to request a quote, speak with one of our knowledgeable Quik-Brik sales representatives by calling **877.506.2745**.

# WALL PERFORMANCE - DESIGN ATTRIBUTES

## COMPRESSIVE STRENGTHS:

Quik-Brik structural veneer units exceed compressive strength requirements of ASTM C-90. Consult a registered professional engineer to determine additional reinforcing schedules required by local building codes and building design.

## FIRE RATINGS:

Quik-Brik structural veneer units typically achieve two to three hour fire ratings, depending on unit dimensions and manufacturing location. Actual values can be provided by your local Quik-Brik Representative.

## SOUND TRANSMISSION:

Quik-Brik structural veneer units typically have an STC (Sound Transmission Class) of 45-48, depending on unit dimensions and manufacturing location. Actual values can be provided by your local Quik-Brik Representative.

## THERMAL PERFORMANCE:

Quik-Brik structural veneer units can be insulated using the same insulation materials used in standard CMU wall construction.

## INDOOR AIR QUALITY:

Quik-Brik structural veneer units do not provide a ready food source for mold and thus reduces the potential for mold growth.

# SPECIFICATIONS

## SUBMITTAL:

Submit color sample(s) of each color specified from Quik-Brik color palette. Submit product literature, test reports, product certifications and full size sample(s) of each color specified or selected.

## QUALITY ASSURANCE:

Decorative Structural Veneer Units shall be Quik-Brik structural veneer units manufactured by an Oldcastle Architectural manufacturing plant. All units shall conform to ASTM C90.

Field Constructed Sample Panels are required. Construct a sample panel no less than 4' by 4' using units representative of those specified. The cleaning material(s) and method(s) shall be tested on the sample panel. Walls built without an approved sample panel shall be considered acceptable.

## DELIVERY, STORAGE & HANDLING:

Quik-Brik structural veneer units shall be delivered to the jobsite on pallets. Stored pallets shall be stacked only one pallet high on level ground and shall be covered with a waterproof covering (e.g. pallets bags/shrink wrap or tarpaulins). Units shall be handled carefully to avoid breakage and damage to the finished surface.

## PROJECT/SITE CONDITIONS:

Cover open walls each day to keep them protected and dry.

# NATIONWIDE AVAILABILITY

OLDCASTLE is the largest concrete products manufacturer in North America. Over 180 locations and a commitment to customer satisfaction assures a level of service and consistency no other supplier can match. Oldcastle's local market presence and national capabilities create the unique ability to meet the ever-changing needs of our customers.
