

# Building Blocks for Success

## There's an Anchor Commercial Product to Fit Your Project.

Anchor Wall Systems provides the flexible, cost-effective solutions that architects, engineers and contractors demand. From golf course borders to landscaping walls, towering interstate retaining walls to sea and channel walls; Anchor offers a low-maintenance, aesthetically, environmentally pleasing solution for virtually any retaining wall application.

The wall next to this newly built casino features Anchor Diamond®.

Anchor Diamond Pro™ was used to enhance the landscape surrounding this new commercial office building.

The Anchor Diamond® and Anchor Vertica® series have been specifically designed to meet the demanding needs of the commercial marketplace. The highly popular Anchor Diamond blocks have set the standard for commercial and high-end residential applications. Straight and beveled units make it easy to construct curves, 90° corners and terraces. Optional step and cap units enhance Diamond's design flexibility. Diamond Pro™ blocks incorporate all the advantages of the regular Diamond

block into a slightly larger size—one square-foot wall face makes estimation and construction easier. Walls built with either Diamond block can be built as high as four feet, or to heights in excess of 30 feet with geosynthetic reinforcement.

The Anchor Vertica series was created for tall wall construction. The four-degree batter creates a near vertical rise which means less excavation and land

The near vertical rise of Anchor Vertica® makes it the perfect choice where space is at a premium.

loss and is the ideal choice when space is at a premium. The Vertica Series includes straight and beveled face units, plus caps and corners for design and construction freedom. All Vertica units provide

Anchor Vertica Pro® is ideally suited for waterway applications such as this municipal project in Dallas.

approximately one square-foot of face coverage which simplifies estimating. Vertica Pro's deeper design allows walls to be built to heights of six feet without reinforcement.
