The Stately and Distinctive Look of Natural Stone

DUFFERIN® Stone is the material of choice for homeowners looking to express their personality and taste in the warmth and elegance of their new home. The distinctive look of its rich textures and natural beauty is surpassed only by its durability.

DUFFERIN Stone masonry veneer not only enhances your home's appearance – it can also significantly improve its value. Available in a variety of colors and shapes, DUFFERIN Stone will make any home the talk of the town...

Why choose DUFFERIN Stone?

- Distinctive natural stone appearance with antiqued finish
- Available in a variety of rich textures and color blends and different patterns to suit individual tastes
- Outstanding curb appeal that increases the value of your home
- Pigments are disbursed throughout the stone, resulting in a durable product that maintains its color year after year
- Can be used exclusively, or as an accent with other cladding materials
- A versatile product, also suitable for interior applications
- Extremely durable and maintenance-free
- Manufactured and backed by Oldcastle Architectural, Inc., a world leader in quality building materials.

Accessories

Surround Stone and **Angled Stone** open up a wealth of additional possibilities for unique architectural features and detailing.

Angled Stone

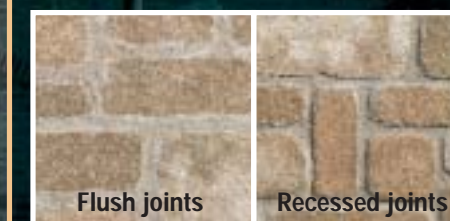

- Eliminates vertical joint
- Improves the aesthetic appeal of a 45° corner
- Improves the solidity of a 45° corner

Surround Stone

- Adds a distinctive, matching look to door and window openings.
- Cost-effective alternative to other surround materials

Joints

Choose from flush or recessed joint styles, each of which adds its own accent... a subtle distinction which makes your home all the more personal and unique.

Colors

DUFFERIN Stone is available in a range of warm color blends. Select your Dufferin Stone to coordinate or complement shingles, doors and other accents.

(Note: color availability will vary by manufacturing location. It is recommended to obtain a sample before final color selection)
