Instructions for Adding an Email Account in: **Android**

Steps

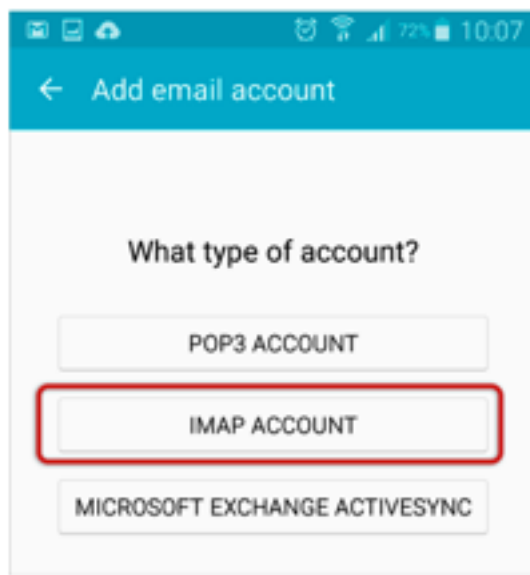

1. Open your email app by tapping the **mail icon** on your apps screen.

2. Type in your email address and password, then choose **Manual Setup** if prompted.

3. Choose the type of email account you want: **POP** or **IMAP** (by default)

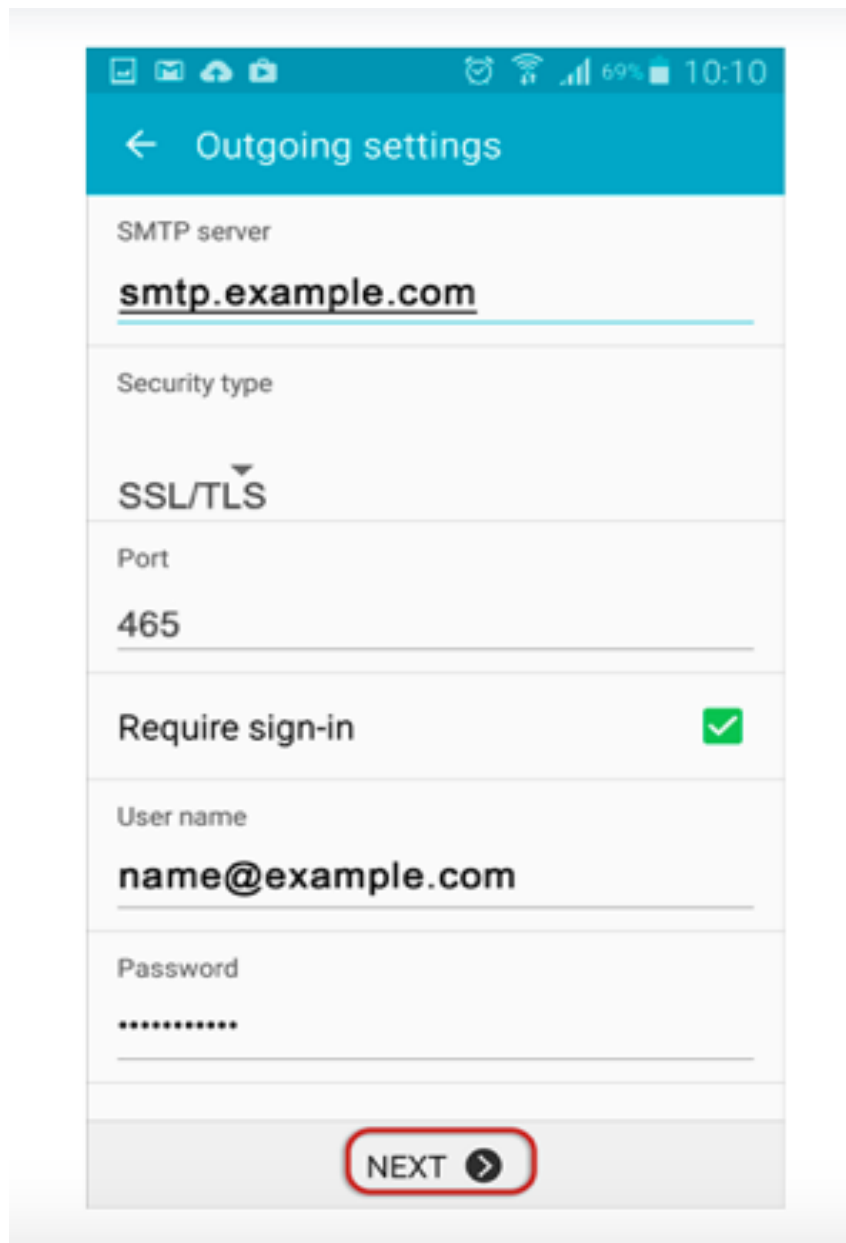

4. If the program can't connect to the server, enter your full email address as the **User Name**.

Then input the **Incoming server details**:

- For POP or IMAP server, use mail.my-domain.com.
- Choose SSL/TLS for security.
- Use port 993 for IMAP or 995 for POP.
- Choose **Next**.

The screenshot shows the 'Incoming server settings' screen on an Android phone. The status bar at the top indicates the time is 10:07, battery is at 72%, and there are icons for notifications, email, and connectivity. The screen has a teal header with a back arrow and the title 'Incoming server settings'. Below the header are several input fields: 'Email address' with the value 'name@example.com', 'Username' with the value 'name@example.com', 'Password' with masked characters '*****', a 'Show password' checkbox which is unchecked, 'IMAP server' with the value 'mail.example.com', 'Security type' set to 'SSL/TLS', 'Port' set to '993', and 'IMAP path prefix' set to 'Optional'. At the bottom right, there is a 'NEXT' button with a right-pointing arrow, which is highlighted with a red circle.

5. Enter the **Outgoing** server details.
 - Use smtp.my-domain.com for SMTP server.
 - Choose SSL/TLS for security.
 - Use port 465.
 - Select **Next**.

6. Please wait while the settings are being tested.
7. Customize any additional **Account Options** as needed.

8. Give your account an optional name (for your own reference) and specify the name you want displayed on outgoing emails. Then, select **Done**.

Set up email

Your account has been set up. You can now change your account name and your name for outgoing emails.

Account name (optional)
name@example.com

Your name (for outgoing emails)
Name Surname

DONE >

9. Your account is now set up successfully and your emails will start downloading.
